3. Vales Sovereign
4. Cabaret
5. Maris Piper

## Sustainable treatments:-

- Addition of compost
- Reduced inorganic fertilizer
- Reduced herbicide application
- Reduced fungicide/pesticide application

# Soil organic matter (2015)

# Black scurf on seed and progeny tubers

# Effect of increased soil organic matter: field trial

- Plant emergence was delayed
- Stolon pruning increased
- Yield decreased
- Black scurf on progeny tubers increased

# Effect of increased soil organic matter:

## Potting mixes

Potting mixes comprised of varying ratios of field soil and either manure or municipal compost were inoculated with *R. solani* AG3 and planted with a single Maris Piper mini-tuber.

Environment?  
Variety?

Field soil 100%

Field soil 75% - Manure 25%

Field soil 50% - Manure 50%

Field soil 25% - Manure 75%

Field soil 75% - Compost 25%

Field soil 50% - Compost 50%

Field soil 25% - Compost 75%

# Effect of increased soil organic matter: Comparing field soils

- 0 sclerotia added
- 0.01g sclerotia added per tuber
- 0.03g sclerotia added per tuber
- 0.06g sclerotia added per tuber
